## OPERATING & CONNECTING

1. Use the HDMI cable to connect the HDMI output port of the HD source with the HDMI input port of the matrix; or use the MHL-HDMI cable to connect the smart phone MHL port with the HDMI input port of the matrix.
2. Connect one cable from each HDMI source devices into HDMI Matrix inputs.
3. Connect one cable from each display into the HDMI Matrix outputs.
4. Connect audio output SPDIF or COAX with stereo equipment
5. Use the IR remote control to remotely switch between sources.
6. After the TV menu settings with MHL device synchronization, you can control the mobile device and switch signal source (given that the TV supports CEC function and the mobile device supports RCP function). For compatibility, please check with your TV or mobile device manufacturer.

The following mobile device has passed factory tests and can support high definition output and RCP function.
